

Contents: 2 metal feet, 2 large telescoping poles, 2 small telescoping poles w/ fixed bolt at end, & 2 small telescoping poles w/out bolt.

Attach the flat ends of the 2 large poles to the 2 metal feet using screws.

Connect 1 small pole w/ fixed bolt to 1 small pole w/out by screwing together. Repeat with remaining poles. You now have 2 long poles w/ a nut at each end.

Lay the banner out flat & adjust the poles to be wider than the width of the banner.

Insert 1 long pole through bottom pole pocket, now attach this pole horizontally to both of the vertical poles w/ the nuts on either side near the base.

Repeat previous step for top of banner & attach to top holes on the vertical poles.

YOUR JUMB BACKDROP BANNER STAND IS READY TO USE!
