

1
Contents: 1 Philips head screwdriver & 2 screws, 2 heavy metal feet, 2 telescoping poles w/ rounded ends & 2 w/ flat ends, & 4 bolts w/ knobs.

2
Insert 1 flat-ended pole into circular hole in metal foot & use philips head screw to secure pole to foot with screwdriver. Repeat for second foot.

3
Adjust height of each pole attached to the feet.

4
Lay banner out flat, take 1 round-ended pole & adjust length so that it is longer than the width of the banner & will stick out on both sides of the pole pocket

5
Insert pole through bottom pole pocket; now attach this pole to the 2 vertical poles that are attached to the feet w/ 2 bolts near the base.

6
Repeat size adjustment of top horizontal bar before inserting through top pole pocket. Attach to top holes on the vertical poles w/ remaining 2 bolts as you did for the bottom.
